ICON GUIDE

TOILET

- Heavy Duty Toilet Seat
- PP toilet lid, slow-descent
- Pressure-resistant
- Ultra-thin water tank
- One-button cleaning
- Premier cistern parts
- Full-glazed pipe, anti-fouling
- Ultra water saving
- Super durability
- Hyper flush, anti-fouling
- Seamless high tank
- Fired at 1280 degrees
- Dual flush, ultra water saving
- Water tank of golden ratio
- Instant-clean glaze

SINK

- Commercial Grade Satin Finish
- Precisely crafted from 304-grade stainless steel
- Thickened and weighted stainless steel
- Pearl sand, no friction, long-lasting
- Wear-resistant
- Deeper sink
- Anti-condensation coating
- Slanted drainage board easy to drain
- Oil-proof design
- Anti-abrasion, rust-proof

BASIN

- Easy cleaning glaze
- Fired at 1280 degrees
- Countertop basin
- Ultra-thin water tank
- Edge grinding

FAUCET

- 360° Rotation
- Multi-layer fine chrome plating
- Precision valve
- Anodizing
- Temperature control
- Fine brushed oil sealing finish
- Multi-layer electroplating
- Premium brass
- Stainless steel
- Space aluminum
- Ultra water saving
- Premium Zinc alloy

SHOWER

- High alkali resistance, resist corrosion and tarnishing
- Handheld Shower
- Shower Head
- Switching mode
- Tub Spout
- Anodizing
- Space aluminum
- Storage rack platform
- Handheld shower spray

CABINET

- Paint-free solid wood boards
- Space aluminum
- Carbon fiber board
- Nano rock undercounter basin
- Undercounter ceramic basin
- Stainless slow-close hinge
- Different storage sections
- Smart mirror

FRENCIA SANITARY WARE FACTORY IN KENYA & GHANA

Global leader in manufacturing ceramic products

TOP1
Local Made

102,000m²
Floor space

2.8M+
Annual production

SINK

Frecia sinks are dedicated to improving everyday efficiency with its unique, thoughtful designs. Our collection of durable kitchen sinks delivers the quality you've come to expect from Frecia. Our sinks are crafted from premium stainless steel and ideal for soaking and washing large pans. Frecia sinks feature a dedicated coating to help with to minimize condensation on the underside and an engineered sound-absorption system significantly reduces disposal and dishwashing noise. They are available in different materials and colored finishes that are resistant to chemical agents and easy to clean .

SINK

Precisely crafted

Precisely crafted from high-grade stainless steel

Thickened and weighted stainless steel

Super durability, Rust-proof

Pearl finish

No friction, Long-lasting

Deep bowl with greater capacity

Best for high end home cooking

SINK

KS-7546B2 Handmade Sink Thickness:0.6mm
341001775 Hole:110mm Size:750X460X215mm

- Thickened and weighted stainless steel
- Deeper sink
- Precisely crafted from high-grade stainless steel
- Commercial Grade Satin Finish
- Anti-abrasion, rust-proof
- Wear-resistant

KS-7843B Handmade Sink Thickness:0.7mm
341001071 Hole:110mm Size:780X430X220mm
With Soap Dispenser With Basket

- Thickened and weighted stainless steel
- Deeper sink
- Precisely crafted from high-grade stainless steel
- Commercial Grade Satin Finish
- Anti-abrasion, rust-proof
- Wear-resistant

KS-6045S Handmade Sink Thickness:0.7mm
341001706 Hole:110mm Size:600X450X220mm

- Thickened and weighted stainless steel
- Deeper sink
- Precisely crafted from high-grade stainless steel
- Commercial Grade Satin Finish
- Anti-abrasion, rust-proof
- Wear-resistant

KS-1250ZL Size:1200X500X180mm
130013238 Hole:72mm Thickness:0.6mm
341000518 Hole:110mm Thickness:0.7mm

- Thickened and weighted stainless steel
- Deeper sink
- Anti-abrasion, rust-proof
- Mirror polishing
- Slanted drainage board easy to drain
- Anti-condensation coating

KS-6045B Handmade Sink Thickness:0.7mm

Installation and after-sales instructions

Sanitary ware installation and maintenance

All sanitary wares, especially shower trays, cannot be fixed with cement, because ceramics will expand and contract with heat. Fixing with cement can also cause ceramic cracking. It is recommended to use special screws or use silicone glass adhesive.

Do not directly contact the ceramic surface and cover plate with strong acid liquid or steel ball. If the glaze is chemically or physically damaged, it will cause problems such as color penetration. It is recommended to use clean water or neutral toilet cleaner.

Always check whether the screws of the cover are fixed. If the looseness of the screw is not handled in time, the hinge may be damaged.

Please find a professional to deal with the clogging of the toilet. Do not dredge it by yourself to avoid damage to the pipeline.

Clean the sand and impurities of the water tank regularly. If the impurities not cleaned in time, the flush valve and other accessories will be damaged, causing problems such as water leakage. It is recommended to install an angle valve with a filter screen.

Suggestions for dealing with common toilet problems

The clogging problem

Clean the sand and impurities of the water tank regularly. If the impurities are not cleaned in time, the flush valve and other accessories will be damaged, causing problems such as water leakage. It is recommended to install an angle valve with a filter screen.

Water consumption problem

The large amount of water stored in the frencia water tank does not mean that the water consumption is large. The water storage capacity can be lowered by adjusting the water valve of the water piece to achieve a balance between water saving and flushing power.

Transportation of toilets

Transportation, especially long-distance transportation may cause damage to the toilet. Pay attention to check the packaging and intactness before shipment. Ceramic products are fragile, so they should be placed according to regulations during loading, and avoid rain and bumps as much as possible during transportation.
